

## FOR THE USERS OF THE PORT OF AVEIRO

### Collection of ship and cargo waste in the Port of Aveiro 2021

#### 1. Aim

Under the terms of the European Parliament and the Council Directive (EU) 2019/883, of 17th April, the Port of Aveiro has the operational means and effective rules to undertake waste collection, to facilitate and encourage the waste delivery through the ships that dock at the port, ensuring proper transportation of the waste to an appropriate final destination.

#### 2. Supervision and Contacts

Communication scope	Supervisor	Phone number	e-mail adress
Waste Reception and Management Plan - APA, S.A.	<b>Maria Manuel Cruz</b> Environment	234 393 348	<a href="mailto:mariammanuel.cruz@portodeaveiro.pt">mariammanuel.cruz@portodeaveiro.pt</a>

### 3. Waste Management Rules

Procedures governing waste collection, transport and destination are outlined in the Waste Management Regulations.

The Port of Aveiro has the necessary facilities to collect ship waste, under the terms of the legislation in force.

Ships must deliver all its waste carried on board to the port reception facility prior to departure.

### 4. Prohibitions

It is forbidden to leave waste in all the Port of Aveiro jurisdiction area as well as to put it in an unsuitable place or container; it is also forbidden to mix recyclable waste, including oil waste with different characteristics that makes it impossible to recycle. Burning waste, injection, deposit or discharge of waste into the ground are not allowed as well as any spill or dumping of chemical products into surface, underground, coastal or marine waters or into wastewater drainage systems.

### 5. Waste Collection Timetable

Waste collection will take place during normal working hours, on working days, from 8:00am to 12:00pm and from 1:00pm to 5:00pm. When duly justified, waste may be collected outside the fixed timetable.

### 6. Advance Waste Notification

Notification must be presented to the Port Authority at least 24 hours prior to the arrival. It can be presented within a shorter amount of time if the port of call is available less than 24 hours prior to the arrival, or if it is only known at the latest upon departure from the previous port and the duration of the voyage is less than 24 hours.

The advance waste notification and the waste collection request forms are available at JUL, [jul.nsw.pt](http://jul.nsw.pt).

Please contact the Terminal Supervisor by phone if the advance waste notification was sent outside the working hours.

### 7. Responsibilities

The operator, agent or master of a ship must supply true and accurate information concerning the waste that he intends to deliver, namely the type, the composition, the quantity and the collection time. The master of the ship is also responsible for any damages caused due to insufficient, imprecise or incorrect information.

## 8. Reception Authorization

After being submitted by the Agent of the ship, the request for waste collection will be subjected to analysis by the APA Services, the Service Provider appointed by the Port Authority, or the Managing Entity, which will verify the availability of reception facilities and setting operating conditions.

## 9. Type of Waste, Quantities and Collection Method

The method of collection of each type of waste is specified in the enclosed Table. The separation of all types of residues is mandatory.

The waste will be collected directly at the ship by the APA Services, the Service Provider pointed by Port Authority, or the Managing Entity, who will measure and quantify all the waste collected.

## 10. Location of Port Waste Reception Facilities

Please see the Terminal map enclosed.

## 11. Fees

The fees associated to the waste collection are outlined in the Waste Collection Tariffs Specific Regulation and are summarized in the enclosed Table (10% of the fees are allocated to the blue fund).

## 12. Waste Delivery Receipt

A waste delivery receipt will be emitted and will be made available at JUL, [jul.nsw.pt](http://jul.nsw.pt), confirming the type and amount of waste collected.

## 13. Complaints

The complaints regarding alleged inadequacies of port reception facilities shall be made by filling the available form at JUL, [jul.nsw.pt](http://jul.nsw.pt), or at the Port Authority website, [www.portodeaveiro.pt](http://www.portodeaveiro.pt). The form must be submitted to the Port Authority.

**The Waste Reception and Management Plan is permanently available for download at [www.portodeaveiro.pt](http://www.portodeaveiro.pt). Suggestions or comments may be sent to [geral@portodeaveiro.pt](mailto:geral@portodeaveiro.pt).**

This leaflet should be read along with the Port of Aveiro Waste Management Regulation and the Port of Aveiro Specific Regulation.

## COLLECTION METHOD OF EACH WASTE TYPE

WASTE TYPE	COLLECTION METHOD
<p><b>MARPOL - ANNEX I</b> (Oil)</p> <p>Every type of oily waste, such as oily residues (sludge), oily tank washings (slops), oily bilge water, dirty ballast water and scale and sludge from tank cleaning</p>	<p>Waste collection within 48 hours after the submission of the request. A tank truck will be used for transportation, unless the volume is lower than 1 cubic meter, in which case a smaller container will be used instead, and transported to an authorized waste management operator.</p> <p>Mixtures containing chemicals must be declared in accordance with current conventions and are subject to prior sampling.</p>
<p><b>MARPOL - ANNEX II</b> (Noxious liquid substances in bulk)</p> <p>Includes cargo residues containing noxious liquid substances, ballast water, tank washings or other mixtures containing such substances</p>	<p>These residues shall be delivered to cargo operators or stowage companies. The Port Authority may collect these residues in accordance with the terms on the enclosed table.</p>
<p><b>MARPOL - ANNEX IV</b> (Sewage)</p> <p>Includes wastewater from sanitary installations, medical treatment facilities, spaces for animal transportation and other mixed water, such as grey and black waters</p>	<p>Waste collection within 48 hours after the submission of the request. A tank truck will be used and the waste will be transported to an authorized wastewater treatment facility.</p>
<p><b>MARPOL - ANNEX V</b> (Garbage)</p> <p>Includes plastics, food waste, domestic waste, such as paper products, rags, glass, metal, crockery, cooking oil, incinerator ashes, operational wastes, animal carcasses, fishing gear, electrical and electronic waste. Cargo residues harmful and non-harmful to the marine environment are also included</p>	<p>The waste will be collected directly at the ship by the APA Services, the Service Provider pointed by Port Authority, or the Managing Entity, scheduling the date and time of the collection at JUL, preferably during normal working hours and without causing any delays to the ship.</p> <p>Containers can be provided, if requested with a minimum notice of 24 hours and 48 hours (for domestic waste containers and for other containers, respectively).</p>
<p><b>MARPOL - ANNEX VI</b> (Air Pollution related)</p> <p>Includes ozone depleting substances, equipment containing such substances and exhaust gas cleaning residues</p>	<p>Containers will be provided after being requested with a minimum notice of 48 hours.</p>
