

**Porto
de Aveiro**

We make
the difference.
**We value
your business.**

01 Competitive factors

CONTAINERS AND RO-RO

Conditions to accommodate new regular lines in the container and ro-ro segments.

STORAGE

Covered and uncovered areas for the storage of goods

LSW – LOGISTIC SINGLE WINDOW

Total digitalisation of the logistic chains used in national ports.

PORT WITHOUT CONGESTION

INNOVATION ECOSYSTEM: GREEN AND SMART

In compliance with the SDGs, the Port of Aveiro approved the roadmap for the energy and digital transition, in order to become a Green and Smart Port, thus committing to its technological modernization and digital transformation, by taking advantage and enhancing the innovation ecosystem of its territory.

FLEXIBLE MULTIMODAL SERVICE

LOGISTICS AND INDUSTRIAL ACTIVITIES ZONE

Dedicated areas to the floating offshore wind industry

BREAKBULK PORT IN PORTUGAL

EXCELLENT ROAD-RAIL ACCESSIBILITIES

02 Business

LIQUID BULK

This Terminal provides facilities dedicated to the handling of chemical, petroleum and biodiesel products. It serves one of the main centres of the Portuguese Chemical Industry.

GENERAL CARGO BREAKBULK

The two Multipurpose Terminals dedicated to this cargo segment provide facilities which meet the needs of economic operators. The extensive area of embankments and excellent road-rail access give the Terminals high levels of competitiveness, efficiency and sustainability

AGRI-FOOD BULK

This Terminal offers excellent conditions for the handling of this type of cargo, with fully automated facilities with unloading rates of 1000 Tonnes/hour.

1000
TONNES/HOUR

UNLOAD RATE

SOLID BULK ◀

This Terminal provides excellent conditions for cargo handling in this segment, with ample areas for uncovered storage and for the construction of warehouses and logistics units.

PROJECT CARGO

Competitive solutions for offshore and large project cargo industries, namely the renewable energy and metalworking industries.

CONTAINERS AND RO-RO

This Terminal offers conditions for regular shipping services. The expansive area of embankments, as well as the 450 meters of quays and a Ro-Ro ramp, enable feeder vessel operations to be carried out quickly and without waiting times. A regular container service runs into the north of Europe.

03 ZALI

Logistics and Industrial Activities Zone
