Decarbonising small and medium ports

Port of Aveiro case study

Port of Aveiro

Where we are

2,4 million 

 **519km** to Madrid
1,100km to Barcelona

Port of Aveiro

Who we are

1,000

6 piers

5,5 million

66 ha

5 terminals

storage

3,5 kms of quay

Port of Aveiro

Vision

The Port of Aveiro will be a **sustainable** port enhancing:

- An efficient and digital way to promote energy efficiency
- The use of resources of renewable origin
- The seamless flow of goods in an interconnected modal shift
- Its economic growth, social development and environment quality improvement, thus meeting the UN SDG.

Port of Aveiro

The Energy Transition Strategy

Roadmap and Business Plan

**Renewable
Energy Sources**

Energy Services

Port Advanced Biofuels

Energy efficiency

Green Land Use Concept

Port of Aveiro

The Energy Transition Strategy

Efficiency of Logistics Chains

Digitalisation

Port Community Network

Smart Port Cities

**Business, Investment and
Funding Opportunities**

Port of Aveiro

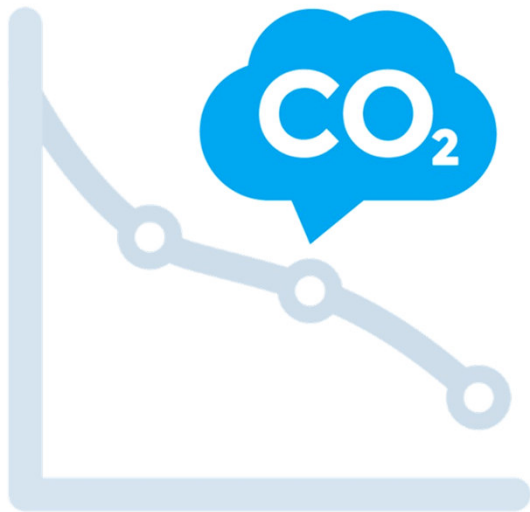

Towards net zero journey

The Port of Aveiro is now..

- carrying out techno-economic feasibility studies to put in place the new solutions;
- looking for European and National funding opportunities to support the necessary investments;
- working closely with its Port Community and other waterborne transport networks.

Port of Aveiro

Towards net zero journey

Climate-neutral
2050
